Name: SOKOI 1 SAFETY HARNESS	Code: FD1111	FD11 FALL ARREST DEVICES - HARNESSES
-------------------------------------	---------------------	---

Description

The harness is made in polyester and it features:
ATTACHMENTS: 1 dorsal "D" attachment for the fall arrest system.
ADAPTABILITY: Adjustable chest belt and leg loops.
ADVANTAGES: Chest strap holding shoulder straps.
ERGONOMICS: Wider comfortable straps for extended time use.
MAXIMUM LOAD: 100 kg

Sokoi harnesses are in polyester, which has a higher resistance to elongation than other materials. The harness does not stretch dangerously in the event of a fall, therefore, the worker does not risk slipping out of the harness.

Sokoi harnesses may be equipped, upon request, with a Tell-Tale fall indicator, positioned, through the seams, on the back of the shoulder; it detaches itself in the event of a fall. The harness must be immediately replaced after a fall.

Technical Specifications:

- Dorsal "D" Attachment for the fall arrest system.
- "A" or "A/2" label: shows the attachment points of the fall arrest system.
- Labels: all the harnesses labels and markings are in an inner strong polyethylene wrapping to prevent the marking from fading.
- Sliders: the ends of the shoulders straps are locked by plastic lips.
- All the textile loops are covered with a fabric reinforcement.

The product has been designed and manufactured to comply with Regulation (EU) 2016/425 and subsequent amendments.
