

FALL ARREST

**Block w/shock absorber+kernm rope 15m**

**FD1313**

**DETAILS**

- Automatic guided type fall arrest device;
- Equipped with an energy absorber and Ciber carabiner as an attachment point, a 15-meter 12 mm Kernmantel rope, and an Anapurna carabiner permanently attached to the rope.

**LANYARD**

15-meter 12mm Kernmantel lanyard

**FEATURES**

Safety device designed for work at height and activities requiring reliable fall restraint and fall arrest systems. The BLOCK model is equipped with an energy absorber and uses a 15-meter Kernmantel rope, designed to ensure strength, durability, and stability even in the most demanding operating conditions. The Ciber carabiner serves as the main attachment point, ensuring a quick and secure connection to the harness or anchor system. The 12 mm Kernmantel rope, featuring an inner core protected by a high-strength outer sheath, ensures excellent abrasion resistance and controlled behavior under load. The device is also supplied with an Anapurna carabiner, which completes the system by offering an additional connection option compliant with the safety standards required for professional work at height. The integration of the energy absorber effectively helps to reduce the energy generated in the event of a fall, improving operator protection and the overall safety of the operation.

**FIELDS OF USE**

- > Construction - road works
- > Works at a height

**MAINTENANCE**

Store in a cool, dry place, away from heat sources and away from light.

**QUANTITY PER CARTON**

5
