

PETZL

60 m AXIS 11 mm rope

FD2128

DETAILS

- Semi-static rope with a sewn loop, ensuring greater safety and strength, and preventing errors in field-made loops;
- Protective sleeve that keeps the connector in the correct position, facilitating quick and precise attachments, and improving the efficiency of maneuvers;
- Length 60 m, offering ample operational freedom, ideal for rope access work with significant vertical development;
- Also available in lengths from 10 to 50 m, allowing selection of the most suitable length for different operational needs or workplace constraints.

FEATURES

Semi-static rope with a sewn termination, designed to ensure maximum safety and practicality in rope operations. The loop features reinforced stitching and is equipped with a protective sheath, which keeps the connector in the correct position, facilitating attachment and making maneuvers faster and more stable. The standard length is 60 meters, ideal for work at height and professional applications that require ample operational margin. It is also available in lengths from 10 to 50 meters, offering the possibility to choose the most suitable configuration for the specific needs of the user or the work context.
