PETZL

AM'D carabiner

FD2141

DETAILS

- Aluminum carabiner, offers high strength with reduced weight, improving handling and comfort;
- D-shape, ensures optimal load distribution on the major axis, increasing safety and reliability;
- Suitable for connecting descenders and positioning lanyards, ensures versatile and stable connections in fall arrest systems;
- Available in two locking systems: TRIACT-LOCK automatic locking system, prevents accidental openings, increasing the level of safety; BALL-LOCK automatic locking system, allows for quick and intuitive opening, while maintaining high protection standards.

FEATURES

D-shaped aluminum carabiner, designed to provide high strength and optimal load distribution along the major axis. Its geometry makes it particularly well-suited for connecting various devices, such as descenders, positioning lanyards, and other components of fall protection systems, ensuring secure and reliable connections. The carabiner is available with two locking systems to suit various operational requirements: - TRIACT-LOCK, an automatic triple-action system that prevents accidental openings; - BALL-LOCK, an automatic system that allows for quick and intuitive opening while maintaining high safety standards. Lightweight, robust, and versatile, it is an ideal solution for work at height, rescue, and professional applications where reliability and practicality are essential.
