FIRST AID

Automatic digital sphygmomanometer

FH1235

DETAILS

• Automatic digital device for self-measurement of arterial blood pressure, it enables simple, rapid, and frequent blood pressure monitoring, fostering prevention and continuous monitoring of cardiovascular health.

FEATURES

Automatic digital blood pressure monitor, designed to provide fast, accurate, and easy measurements directly at home or in a professional setting. Thanks to its automatic operation, it allows intuitive use even for inexperienced users, enabling continuous and reliable monitoring of blood pressure. Compact and practical, it is ideal for regular cardiovascular health monitoring.
