TECHNICAL SHEET

FIRST AID

Detectable patch blue (pack 100 pcs)

FH1237

DETAILS

- Metal-detectable adhesive plaster for food processing, reduces the risk of product contamination, ensuring greater safety in the production process;
- Blue color, ensures maximum immediate visibility in case of accidental detachment;
- Pack of 100 pieces, offers a practical and convenient supply for continuous use;
- Dimensions 2 x 7 cm, for effective coverage of small wounds that do not restrict movement.

FEATURES

Metal-detectable plaster, specifically designed for use in food processing, where contamination control is critical. Its high-visibility blue color facilitates immediate detection in case of detachment. Supplied in packs of 100 pieces, with dimensions of 2 x 7 cm, it is ideal for effectively covering small wounds while simultaneously ensuring safety, hygiene, and compliance with HACCP procedures in food production environments.
