FIRST AID

SANBOX patch dispenser

FH1238

DETAILS

- ABS dispenser, ensuring impact resistance, long lifespan, and hygiene in work environments;
- Includes 2 refills of fabric plasters in various sizes, ensuring an immediate and versatile supply for covering different types of wounds;
- Extractable plaster ready for immediate application, allowing for quick intervention without contact with the adhesive part, improving hygiene and speed;
- Necessary for wall mounting, allowing for simple and immediate installation, making the dispenser always visible and accessible.

FEATURES

Plaster dispenser made of durable ABS, designed to ensure maximum hygiene, practicality, and speed of use in work environments. It is supplied complete with 2 refills of assorted fabric plasters, ideal for the immediate protection of small wounds. Thanks to the automatic extraction system, when a plaster is removed, its wrapper opens, directly exposing the adhesive part, making the plaster immediately ready for application, without the need for additional handling. The dispenser is supplied with everything needed for wall installation, ensuring a stable, visible, and always accessible placement for prompt first aid.
