

CUT-RESISTANT GLOVES

BUTCHERS glove

MA1821

THICKNESS

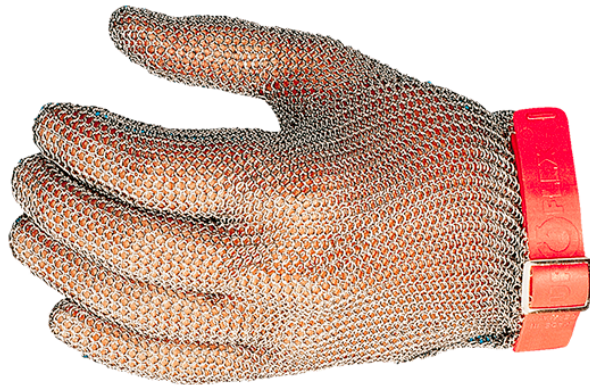

0.55 mm

CUFF

Plastic adjustment buckle

FEATURES

Ambidextrous butcher's glove made of stainless steel mesh with 0.55 mm thick rings, designed to provide high protection in processes involving risks of deep cuts. The metal ring structure ensures a resistant and uniform barrier, while maintaining good hand flexibility and facilitating movements during cutting and deboning operations. Equipped with a plastic adjustment buckle, it allows for a stable and customizable fit, improving user safety and comfort. Its ambidextrous design facilitates practical use and increases its versatility, making it suitable for food and professional environments where high protection against injuries from knives and sharp blades is required.
