The insoles, made of multi-punched EVA material, have anti-shock properties with variable thickness: 3 mm in the front and 10 mm in the heel area.

Antistatic.

The 3D TEX (Airmesh) polyester lining is specially designed to allow ventilation of the foot and thus reduce the sweating effect. Equipped in the heel area with a microfibre insert to increase abrasion resistance and, at the same time, to prevent the foot from slipping off.
