

FOOTBEDS

CROSS foam footbed

MB9815

DETAILS

Variable thickness monolithic polyurethane foam material

FEATURES

Insole designed for Total Plane footwear, made from monolithic polyurethane foam material with variable thickness to ensure targeted support in different areas of the foot: 2.5 mm in the forefoot to promote flexibility and 9 mm in the heel area for superior shock absorption. The lined and perforated surface in the arch area improves breathability and enhances anti-shock properties, contributing to reduced fatigue during prolonged use. Thanks to its antistatic properties, it also offers additional protection in environments where it is necessary to limit the accumulation of electrostatic charges, ensuring high comfort and safety.

QUANTITY PER CARTON

100

AVAILABLE COLOURS

● Z9 - Black

SIZES

In stock
 On production
 Made to order
 Tailor made

FIELDS OF USE

- > Agriculture - gardening - forestry
- > Food - cleaning - hospital
- > Construction - road works
- > Chemical-pharmaceutical industry
- > Light industry
- > Heavy industry
- > Petrochemical industry
- > Works at a height
- > Logistics
- > Tertiary - trades

MAINTENANCE

Store in a cool and dry place, away from heat sources and protected from light.
