

FOOTBEDS

PU FOAM footbed

MB9834Z9

DETAILS

- Superior comfort: the open-cell structure ensures softness and an elastic return that reduces fatigue even after many hours of use;
- Shock absorption: cushions loads during walking and more intense movements, protecting joints and the spine;
- Anatomical support: the ergonomic profile supports the foot, particularly in the heel and arch area;
- Durability: the material maintains shape and performance longer than traditional insoles."

FEATURES

Polyurethane foam footbed, designed to ensure optimal support in the heel area, ensuring superior comfort. Thanks to its open-cell structure, it offers softness and excellent elastic return. It ensures effective shock absorption, cushioning loads during walking and more intense activities, with benefits for joints and the spine. The anatomical support promotes correct foot posture. It maintains its shape and superior performance over time thanks to the quality materials it is made from. It improves stride stability, contributing to a more uniform weight distribution and a safer and more balanced walk.
