TECHNICAL SHEET

FUSION SERIES

FUSION STRETCH trousers

MC1716QJ

MATERIALS
Cotton Stretch 97% cotton, 3% spandex. Brushed, water repellent.

WEIGHT
240 g/m²

FEATURES
Work trousers made from stretch fabric, the garment offers an ideal combination of robustness and comfort, promoting ample freedom of movement. The presence of a high percentage of cotton, combined with technical fibers, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The particular attention to the finishes guarantees its extended durability. The extremely refined appearance and the contrasting color of the inserts make the Fusion series the evolution of workwear. The stretch fabric adapts to body movements, making activities that require bending, lifting, or uncomfortable positions more comfortable. It adapts to the body's shape, avoiding tension points, maintaining its original form even after intense movements, reducing wrinkles and sagging. The water repellent treatment protects the garment from light rain and stains, keeping it clean longer. The 6 pockets make it extremely functional and practical, allowing essential tools and items to always be within reach during work. On the right side, there is also a hammer loop and, complementing the multi-function technical pocket, pen and mobile phone holders. The oversized belt loops ensure compatibility with robust belts, while the contrasting color reinforcement bar tacks and interlocking double seams guarantee solidity and durability over time. Reflective inserts on the side pockets and at the bottom of the leg increase operator visibility.

DETAILS
