TECHNICAL SHEET

GEMINI SERIES

GEMINI trousers

MC2041Z9

MATERIALS

Stretch canvas 60% cotton, 38% polyester, 2% elastane, with 4-way stretch inserts 93% nylon, 7% elastane, reinforcements in 500D nylon Cordura®.

WEIGHT

260 g/m²

FEATURES

Work trousers made of stretch fabric with bi-stretch inserts, distinguished by their high quality and extensive array of multi-function pockets, designed to meet the needs of the most demanding professionals. The stretch fabric ensures a comfortable fit and superior freedom of movement, ideal for tackling long workdays in total comfort. A high percentage of cotton, combined with technical fibers, perfectly balances protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The 6 pockets make them extremely functional and practical, allowing essential tools and items to always be at hand during work. On the right side, one of the multi-function pockets is equipped with tool loops, making the trousers extremely versatile. The design is completed by bi-stretch fabric kneepad pockets for flexible protection, reinforced heel cuffs with anti-wear fabric for increased durability, and a bi-stretch back panel for optimal comfort. Reflective inserts on the pockets and back of the leg further increase the garment's visibility. Interlocking double stitching ensures robustness and durability over time.
