TECHNICAL SHEET

SERIES KOMBAT

CLUB STRETCH trousers

MC2115Z9

MATERIALS

4-way stretch fabric 90% polyester and 10% spandex. Water-repellent treatment.

WEIGHT

240 g/m²

FEATURES

Work trousers made from 4-way stretch fabric, designed to ensure maximum freedom of movement and superior comfort. The water-repellent treatment provides protection against splashes and moisture, making them ideal for demanding operational environments and ensuring a clean and presentable appearance even after long hours of work. The main fabric, lightweight and breathable, ensures optimal ventilation, keeping the skin cool and dry even in the most demanding conditions. Particularly suitable for the summer season. The design is engineered to combine practicality and durability; the 5 pockets make them extremely functional and practical, allowing essential tools and items to always be within reach during work. The waist features elastic side inserts that improve fit and comfort during the most demanding activities. Pre-shaped knees follow the body's natural anatomy, promoting fluid movements and reducing fatigue. Double reinforced seams ensure superior durability even in the most stressed areas, providing the trousers with a robustness that makes them reliable over time.

DETAILS

- 2 hip pockets, for quick and easy access to smaller items;
- 2 back pockets with flap and Velcro closure, for storing bulkier items without the risk of them falling out;
- Welt pocket with zipper closure on the right leg;
- Elastic side inserts at the waist, for maximum freedom of movement and comfort;
- Pre-shaped knees, for an ergonomic fit;
- Double reinforced stitching in areas most subject to stress and wear, for increased strength and durability.

CLOSING

Zip and tuck button.
