GRAMMAGE

280 g/m²

FEATURES

Work trousers made from canvas and 4-way stretch fabric, designed to offer robustness, comfort, and freedom of movement. The 4-way stretch fabric inserts ensure multi-directional elasticity, while Oxford Cordura® 500D reinforcements ensure exceptional durability in high-stress areas. Equipped with Airbelt®: a soft Airmesh fabric inner waistband for enhanced support and breathability. The presence of a percentage of cotton, combined with technical fibers, helps perfectly balance protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The pre-shaped legs with ergonomic cut and front and back bi-stretch inserts, as well as behind the knees, improve mobility during work activities. The trousers are equipped with removable external pockets, in addition to 6 pockets, all reinforced with Cordura® for increased durability. The gusseted knee pad pockets, heel protector, and strategic Cordura® inserts offer protection and durability. The 4 cm extendable leg length allows for a customizable fit. Reinforced triple stitching and ultra-durable YKK® zippers, synonymous with long-term reliability, complete the design. Reflective inserts on the front pockets, removable pockets, and back of the leg further increase the garment's visibility.

DETAILS
