TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

CONTRAST sweatshirt

MC2916ZG

MATERIALS
Fleece 65% polyester and 35% cotton.

WEIGHT
300 g/m²

FEATURES
Work sweatshirt made of fleece and cotton, designed to offer maximum protection to those working in hazardous environments. Warm and practical, with a minimal and modern design that is perfect for most of the year, it ensures superior comfort and freedom of movement, also suitable for outdoor activities. Certified Class 1 for high visibility, the garment guarantees a basic level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The chest pocket allows essential tools and items to always be at hand during work, as do the side pockets. The ribbed knit cuffs and hem are designed to ensure greater adherence and ergonomics, contributing to the maintenance of the internal microclimate and the user's thermal comfort. The heat-sealed and segmented reflective bands adapt optimally to body movements, offering greater comfort and freedom of action. More resistant and durable than traditional bands, they are strategically positioned on the shoulders, chest, sleeves, and waist, and together with the reflective inserts on the chest, they contribute to further increasing the garment's visibility. The high-visibility contrast fabric inserts on the sleeves and chest complete the modern design and contribute to increasing operator safety.

DETAILS
- Adjustable hood with drawstring, for increased thermal comfort;
- Zippered chest pocket on the right side, with PVC badge holder;
- 2 zippered side pockets, to ensure quick and easy access to smaller items;
- Rib-knit cuffs and hem, for an ergonomic closure that ensures a snug fit at the wrist;
- Contrast fabric on sleeves and chest, for increased visibility in adverse conditions.

CLOSING
Zip.

REFLEX
Heat-sealed segmented reflective bands on shoulders, chest, sleeves, and waist. Reflective inserts on the chest.
