

UNDERWEAR

SIRFLEX underwear set

MC3211

MATERIALS

94% bamboo, 6% spandex

GRAMMAGE

200 g/m²

FEATURES

Breathable underwear set consisting of a long-sleeved top and tights with a front opening, designed to offer maximum comfort even in the most demanding conditions. Made from stretch technical fabric, it guarantees high thermal insulation and a rapid ability to wick away moisture generated by perspiration, keeping the skin dry and protected. The unique properties of bamboo fiber make the garment hypoallergenic, extremely lightweight, and pleasant against the skin. The fabric's high elasticity ensures a snug yet comfortable fit that adapts perfectly to body movements, making this set ideal for use in any condition, both for work and outdoor activities. Perfect as a thermal layer to ensure warmth, breathability, and freedom of movement during all activities.

DETAILS

- Long-sleeved jersey, ensuring better thermal protection for the entire upper body;
- Tights with a front opening, offering practicality and comfort during prolonged use;
- Contrast stitching, enhancing the garment's aesthetics and highlighting its structure, adding a sporty and modern touch;
- High thermal insulation, maintaining constant body temperature even in cold conditions, ensuring comfort during any activity.
