TECHNICAL SHEET

CHEMICAL PROTECTION

TEFLON jacket

MC3314Q5

MATERIALS
65% polyester, 35% cotton.

WEIGHT
245 g/m²

FEATURES
Work jacket made from polycotton fabric, designed to ensure safety for those working in hazardous environments where exposure to multiple dangers is constant. It offers integrated protection from splashes of liquid chemicals. The presence of a percentage of cotton, combined with technical fibers, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The design is practical and functional: two lower pockets closed with flap and velcro allow tools to be stored safely, while elasticated cuffs ensure a snug fit and additional protection, preventing the entry of external agents. The front closure is designed to reduce the risk of infiltration.

DETAILS
- Low pockets closed with flap and velcro, to ensure quick access to small everyday items;
- Elasticated cuffs, for an ergonomic and stable fit, prevent hazardous external agents from entering the sleeve.

CLOSING
Zipper covered by a Velcro-fastened flap.

IMPORTANT
The jacket is certified in combination with the TEFLON trousers MC3311.

AVAILABLE COLOURS
- C0 - DARK GREY
- Q5 - DARK BLUE
- K1 - WHITE
