TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

MISTRAL short jacket

MC3518E1

MATERIALS
Mistral 55% cotton and 45% polyester.

WEIGHT
245 g/m²

FEATURES
Work jacket made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric contributes to maintaining the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. It is the summer version of our certified High-Visibility garments. The fabric surface enhances liquid and dirt repellent properties. Certified Class 2 for high visibility, it ensures a medium-high level of visibility in both daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The large chest pockets make the jacket functional and practical, allowing essential tools and items to always be within reach during work. The reflective bands applied to the bottom of the jacket and sleeves further increase the garment's visibility. Double stitching ensures greater mechanical resistance and durability over time, making the garment reliable even under intensive use conditions. The garment is certified to maintain its safety and high visibility characteristics for up to 50 wash cycles, ensuring consistent performance over time.

DETAILS
- 2 chest pockets closed with flap and Velcro, one of which is three-dimensional and equipped with a pen holder, to ensure quick and convenient access to smaller items;
- Double stitching in areas most subject to wear, for increased garment durability.

CLOSING
Five buttons covered by a flap.

REFLEX
Double reflective bands sewn on jacket hem and sleeves.

REMARKS
Update of 11/11/2025 - 50-wash certification available from lots chronologically subsequent to lot no. 835092505
