TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

MISTRAL COLOR trousers

MC3521ED

MATERIALS
Mistral 55% cotton and 45% polyester.

WEIGHT
245 g/m²

FEATURES
Work trousers made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric helps maintain the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. This is the summer version of our certified High-Visibility garments. The fabric surface enhances liquid and dirt repellent properties. Certified Class 2 for high visibility, it ensures a medium-high level of visibility in both daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The upper part of the trousers is made of high-visibility fabric, contrasting with the lower part in dark fabric, a solution that improves visibility, as well as the aesthetics and presentation of the garment even after prolonged use. The 5 pockets make them extremely functional and practical, allowing essential tools and objects to always be within reach during work. The reflective bands applied to the bottom of the leg further increase the garment's visibility. The elasticated back waistband contributes to an ergonomic and functional fit, making the garment suitable for a wide range of operational contexts. The double interlocked seams ensure greater mechanical resistance and durability over time, making the garment reliable even under intensive use conditions. The garment is certified to maintain its safety and high-visibility characteristics for up to 50 wash cycles, ensuring consistent performance over time.

DETAILS
- 2 reinforced patch pockets with side entry, to ensure quick and convenient access to smaller items;
- Technical three-dimensional pocket on the left, closed with flap and velcro, allows storing bulkier items without the risk of them falling out;
- Ruler pocket on the right;
- Back pocket closed with flap and velcro;
- Elasticated waist at the back;
- Double stitching in areas most subject to wear, for increased garment durability;
- High-visibility fabric in the upper part and contrast fabric in the lower part of the leg, in the waistband, and in the pocket flaps, for a better aesthetic presentation of the garment even after prolonged use.

CLOSING
Zip and button.

REFLEX
Double sewn reflective bands.
