

HIGH VISIBILITY CLOTHING

MISTRAL trousers

MC3522

MATERIALS

Mistral 55% cotton and 45% polyester.

GRAMMAGE

245 g/m²

FEATURES

Work trousers made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric contributes to maintaining the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. It is the summer version of our certified High-Visibility garments. The fabric surface enhances liquid and dirt repellency. Certified Class 2 for high visibility, it ensures a medium-high level of visibility in both daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The 5 pockets make it extremely functional and practical, allowing you to always have essential tools and items at hand during work. The reflective bands applied to the lower leg further increase the garment's visibility. Double stitching ensures greater mechanical resistance and durability over time, making the garment reliable even under intensive use conditions. The garment is certified to maintain its safety and high visibility characteristics for up to 50 wash cycles, ensuring consistent performance over time.

DETAILS

- 2 reinforced side-entry patch pockets, ensuring quick and convenient access to smaller items;
- Three-dimensional technical pocket with flap and velcro closure on the left, allowing for the storage of bulkier items without the risk of them falling out;
- Tape measure pocket on the right;
