TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

GREEN COLOR jacket

MC3525EF

MATERIALS

Yellow high visibility 55% cotton and 45% polyester. Green 65% polyester and 35% cotton.

WEIGHT

245 g/m²

FEATURES

Work jacket made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric contributes to maintaining the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. Certified Class 2 for high visibility, the garment ensures a medium-high level of visibility in daytime and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The upper part of the jacket is made of high-visibility fabric, contrasting with the lower part in green fabric, a solution that improves visibility, as well as the aesthetics and presentation of the garment even after prolonged use. The double reflective bands on the sleeves and chest increase the operator's visibility, improving safety during work activities. The 2 pockets make it functional and practical, allowing essential tools and items to always be within reach during work. The adjustable cuffs with Velcro ensure a stable and snug closure, preventing movement during use.

DETAILS

- 2 chest storage pockets, ensuring quick and convenient access to smaller items;
- Velcro-adjustable cuffs, for a snug fit around the wrist that prevents shifting during use;
- High-visibility fabric in the upper section and contrast fabric in the lower section, on sleeve and jacket hems, for an improved aesthetic appearance of the garment even after prolonged use.

CLOSING

Zip covered by a flap closed by snap buttons.

REFLEX

Double reflective bands sewn on the sleeves and around the chest.
