

SUPERTECH SERIES

SUPERTECH waistcoat

MC3538

MATERIALS

75% cotton, 24% polyester, 1% antistatic fiber.

GRAMMAGE

280 g/m²

FEATURES

Work vest made from multi-purpose fabric with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection against flames, convective, radiant, and contact heat, as well as from small splashes of molten metal. Certified Class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The antistatic properties of the fabric complete the garment's safety profile. The high percentage of cotton, combined with technical fibers, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The reflective bands sewn onto the chest help to increase the operator's visibility, improving their safety during work activities.

DETAILS

- Antistatic, reduces the accumulation of static electricity on the body;
- Flame-retardant treated fabric, increases safety against small flames and heat.

CLOSING

Zip covered by a Velcro-fastened flap.

REFLEX

Double reflective bands sewn on the chest.

IMPORTANT

Partial protective garment to be worn over other devices with the same protection characteristics.

AVAILABLE COLOURS

-  E1 - Hi-vis yellow
