TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

TRAFFIC waistcoat

MC3548E0

MATERIALS

100% polyester compact and breathable tricot fabric

WEIGHT

170 g/m²

FEATURES

High-visibility vest made from perforated polyester, a material that ensures excellent breathability even during prolonged use in hot environments or intense working conditions. The micro-perforated structure promotes air circulation, contributing to operator comfort and reducing the sensation of heat. Certified to Class 2 high-visibility standards, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The garment features dual reflective bands, strategically positioned on the chest to ensure optimal visibility. The internal sweat-wicking yoke, positioned in the shoulder and neck area, is designed with absorbent material to ensure comfort and freshness even during the most intense activities, keeping the garment dry and tidy. The 4 pockets make it extremely practical and functional. The design is intended to be worn over other garments without compromising freedom of movement.

DETAILS

- 2 three-dimensional chest pockets with flap and velcro closure, for storing bulkier items;
- 2 lower welt pockets with covered zipper closure, to ensure quick and convenient access to smaller items;
- Inner sweat-wicking yoke, to protect the outer fabric and keep the garment drier and more comfortable during use.

CLOSING

Zip.

REFLEX

Double sewn reflective bands.
