

HIGH VISIBILITY CLOTHING

MISTRAL 200 trousers

MC3552

MATERIALS

55% cotton, 45% polyester

GRAMMAGE

200 g/m²

FEATURES

Work trousers made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric helps maintain the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. This is the summer version of our certified High-Visibility garments, with an even lighter fabric weight. The fabric surface enhances liquid and dirt repellent properties. Certified Class 2 for high visibility, it ensures a medium-high level of visibility in both daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The 5 pockets make it extremely functional and practical, allowing essential tools and items to always be at hand during work. The heat-sealed and segmented reflective bands, applied to the lower leg, further increase the garment's visibility. Double stitching ensures greater mechanical resistance and durability over time, making the garment reliable even under intensive use conditions. The garment is certified to maintain its safety and high visibility characteristics for up to 50 wash cycles, ensuring consistent performance over time.

DETAILS

- 2 reinforced patch pockets with side entry, to ensure quick and convenient access to smaller items;
- Technical patch pocket closed with flap and velcro on the left, allows storing bulkier items, without the risk of them falling out;
- Ruler pocket on the right;
- Back pocket closed with flap and velcro;
- Rear elastic waistband, allows maximum freedom of movement, without restrictions;
- Double stitching in the areas most subject to stress and wear, to ensure greater resistance and durability.

CLOSING

Central closure with zipper and button

REFLEX

Double heat-sealed segmented reflective bands on the lower leg. Transverse reflective inserts.
