TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

VELVET COverall

MC3618H1

MATERIALS
Velvet fustian 60% cotton and 40% polyester.

GRAMMAGE
350 g/m²

FEATURES
Work coverall made of polycotton, with a high percentage of cotton that ensures natural thermoregulation. The fabric contributes to maintaining the body's thermal balance, reducing the impact of environmental variations thanks to cotton's ability to interact with the internal microclimate. It is the winter version of our certified High Visibility garments. The fabric offers thermal comfort, tenacity, and robustness, combined with excellent wash resistance. Certified Class 3 for high visibility, it ensures the highest level of visibility in both daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The 4 pockets make it functional and practical, allowing essential tools and objects to always be within reach during work. The reflective bands applied to the chest, sleeves, and leg bottoms further increase the garment's visibility. The elasticated back waistband contributes to an ergonomic and functional fit, making the garment suitable for a wide range of operational contexts. The double seams ensure greater mechanical resistance and durability over time, making the garment reliable even under intensive use conditions. The garment is certified to maintain its safety and high visibility characteristics for up to 50 wash cycles, ensuring consistent performance over time.

DETAILS
- 2 patch pockets with side entry, to ensure quick and easy access to smaller items;
- Ruler pocket on the right;
- Chest pocket closed with flap and velcro;
- Back elasticated waistband, for an ergonomic and comfortable fit;
- Double stitching in high-wear areas, for increased garment durability.

CLOSING
Covered double-slider zip.

REFLEX
Double reflective bands around the chest, sleeves, and leg bottoms.
