

HIGH VISIBILITY CLOTHING

REGIMENTAL SPLIT jacket

MC4116

MATERIALS

100% polyester bilaminated twill, supersoft TPU.

GRAMMAGE

Padding 180 gr/m²

FEATURES

Work jacket made from multi-purpose fabric with double thermoplastic polyurethane lamination, which guarantees protection from weather elements and good elasticity, designed to ensure maximum safety for those working in environments with adverse weather conditions. Thanks to its waterproof and breathable properties, it offers extremely effective protection in adverse weather conditions. Certified Class 3 for high visibility, the garment ensures the maximum level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The heat-sealed and segmented reflective bands on the outer jacket and the sewn-on ones on the inner jacket significantly increase operator visibility, improving safety during work activities. The heat-sealed and segmented reflective bands optimally adapt to body movements, offering greater comfort and freedom of action. The padding also makes it ideal for the harshest climates. The 4-in-1 jacket is designed for maximum versatility of use in variable climatic contexts. The modular structure allows for different configurations thanks to the inner jacket with detachable sleeves and numerous multi-function pockets, which enhance its operational practicality. The possible combinations, thanks to the detachable inner layer, allow adaptation to different seasons, making the garment suitable for continuous use throughout the year. The outer jacket features a concealed hood, which is designed for use in adverse environmental conditions, such as rain or wind. When not in use, it can be stored inside the collar, without creating bulk or compromising the operator's freedom of movement. The 8 pockets, including 2 hand warmers, make it extremely functional and practical, allowing essential tools and items to always be within reach during work. The inner jacket also has 3 pockets, for a total of 11 across both garments. The adjustable elastic cuffs with Velcro are designed to ensure an ergonomic and

snug fit at the wrist, effectively limiting the penetration of liquids, wind, and other extreme weather elements, contributing to the maintenance of the internal microclimate and the user's thermal comfort.

DETAILS

Outer Jacket:

- Foldaway hood with drawstring, detachable thanks to snap buttons, usable when needed to provide protection from weather elements;
- 2 water-resistant lower pockets, closed with a flap secured by velcro, allowing for storing bulkier items without the risk of them falling out;
- 2 water-resistant chest pockets, closed with a flap secured by velcro, the right one with a retractable badge holder and the left one with a vertical pocket closed by a water-resistant zipper;
- 2 handwarmer pockets at the hips, for high thermal comfort;
- D-ring on the chest;
- 2 internal pockets, one phone pocket and the other closed by a zipper;
- Elasticated cuffs adjustable with velcro, for an ergonomic and secure closure.

Inner Jacket:

- Zip-off sleeves, offering various usage options;
- 2 pockets closed by a zipper;
- Internal pocket closed with a zipper.

CLOSING

Central two-way zip covered by a flap.

REFLEX

Outer jacket: Double segmented heat-sealed reflective bands around the waist, on the sleeves, and vertically on the shoulders. Inner jacket: Double sewn reflective bands around the waist and on the sleeves. On both jackets: Contrast inserts on the hem, sleeves, shoulder yoke, and collar.
