

HIGH VISIBILITY CLOTHING

MOTORWAY SPLIT jacket

MC4124

MATERIALS

Oxford 300D PU water-repellent lamination, 100% polyester.

GRAMMAGE

220 g/m² padding

FEATURES

A work jacket made from a multi-purpose fabric designed to ensure maximum safety for those working in hazardous environments. Thanks to its waterproof and breathable properties, it offers extremely effective protection in adverse weather conditions. It also guarantees high resistance to heat dispersion, contributing to protection from cold down to temperatures of -5°C. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in both daytime and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. Reflective bands sewn on both the outer and inner jackets significantly increase operator visibility, improving safety during work activities. The Oxford 300D fabric with water-repellent polyurethane lamination gives the garment high resistance to water penetration, making it particularly suitable for use in demanding environments and adverse weather conditions, without compromising the material's durability and flexibility. The padding also makes it ideal for the harshest climates. The 4-in-1 jacket is designed for maximum versatility of use in varying climatic conditions. Its modular structure allows for various configurations thanks to the inner jacket with detachable sleeves and numerous multi-function pockets, which enhance its operational practicality. The possible combinations, thanks to the detachable inner layer, allow adaptation to different seasons, making the garment suitable for continuous use throughout the year. The outer jacket features a retractable hood, designed for use in adverse environmental conditions such as rain or wind. When not in use, it can be stored inside the collar, without creating bulk or compromising the operator's freedom of movement. The fleece-lined collar ensures high thermal comfort. The 5 pockets, including 2 waterproof ones, make it extremely functional and practical, allowing essential tools and items to always be within reach during work. The inner jacket also features 4 pockets, for a total of 9 across both

garments. The elasticated cuffs, as well as the waist and collar, are designed to ensure an ergonomic and snug fit, effectively limiting the penetration of liquids, wind, and other extreme weather elements, contributing to the maintenance of the internal microclimate and the user's thermal comfort.

DETAILS

Outer Jacket:

- Retractable hood with drawstring, usable when needed to provide protection from atmospheric agents;
- Collar with contrasting anti-dirt trim and insert, for a better aesthetic presentation of the garment even after prolonged use;
- Right chest pocket for mobile phone, closed with velcro, with removable retractable badge holder;
- 2 waterproof lower pockets closed with flap and velcro, allowing larger items to be stored without the risk of falling out;
- Internal pocket closed with velcro, for valuables such as a wallet or document holder;
- Vertical pocket closed with zipper;
- Windproof cuffs in elasticated knit, for an ergonomic closure that contributes to thermal comfort.

Inner Jacket, in fluorescent fabric, detachable with zipper:

- Detachable sleeves with zip, offering various usage options;
- Fleece collar lining, for high thermal comfort;
- Collar with anti-dirt trim, for a better aesthetic presentation of the garment even after prolonged use;
- 2 lower pockets closed with covered zip;

- 2 internal pockets, one closed with zip and the other for mobile phone, closed with flap and velcro.

On both jackets:

- Contrasting anti-dirt inserts on jacket hem and sleeve hem.

CLOSING

Zip covered by a flap closed by snap buttons.

REFLEX

Reflective strips on chest, sleeves, and shoulders.
