TECHNICAL SHEET

HIGH VISIBILITY CLOTHING

MATRIX HI VIS jacket

MC4141HE

MATERIALS
Twill 100% polyester, TPU-laminated.

WEIGHT
145 g/m², body padding 200 g/m², sleeve padding 180 g/m²

FEATURES
Work jacket made of laminated twill fabric with a TPU membrane, offering a perfect balance of mechanical resistance, weather protection, and comfort. The twill gives the garment a robust yet flexible structure, while the TPU lamination ensures waterproofing, windproofing, and breathability, making it ideal for intensive use in adverse weather conditions. The padded interior makes the garment suitable for low temperatures and ensures thermal comfort. Thanks to its waterproofing and water vapor resistance properties, it offers extremely effective protection in adverse climatic conditions. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The high windproof collar, with a dirt-resistant lined interior, effectively protects the cervical area. The padded hood, detachable via zipper and adjustable with a drawstring, is designed for use in adverse environmental conditions such as rain or wind. When not in use, it can be detached without creating bulk or compromising the operator's freedom of movement. Reflective bands sewn on the chest, sleeves, and shoulders significantly increase operator visibility, improving safety during work activities. The 3 pockets make it functional and practical, allowing essential tools and items to always be within reach during work. The elasticated cuffs, adjustable with Velcro, are designed to ensure an ergonomic and snug fit around the wrist, effectively limiting the penetration of liquids, wind, and other extreme weather elements, contributing to the maintenance of the internal microclimate and the user's thermal comfort.

DETAILS
- Dirt-resistant lined collar, ensuring a better garment appearance even after prolonged wear;
- Padded hood, detachable with a zipper and adjustable with a drawstring, usable as needed for protection against the elements;
- Right chest pocket, closed with a zipper covered by a flap, ensuring quick and convenient access to smaller items;
- Two lower pockets with zippers, allowing for storage of bulkier items without the risk of them falling out;
- Soft and quilted padding for high thermal comfort;
- Cuffs adjustable with Velcro for an ergonomic closure.

CLOSING
Zip with an internal wind flap, covered by a flap closed by velcro.

REFLEX
Double reflective bands sewn on the chest and sleeves.

AVAILABLE COLOURS
