

WEATHERPROOF CLOTHING

JASPER jacket

MC4224

MATERIALS

Ultralight nylon. Anti-pilling grey melange jersey inserts, 100% polyester bonded with fleece.

GRAMMAGE

40 g/m², padding 100 g/m²

FEATURES

Ultralight work jacket in anti-pilling knit and stretch fleece. This jacket combines lightness, comfort, and durability, ideal for active professionals. Made from anti-pilling technical fabric with stretch fleece inserts, it ensures an ergonomic fit and maximum freedom of movement. Thanks to its insulation, it is perfect for tackling variable weather conditions: waterproof, it offers thermal insulation for cold environments, making it a jacket suitable for diverse climates. Featuring a vertical zippered chest pocket for securely storing items and two lower zippered pockets in a contrasting color, it combines practicality and modern style. The elasticated trim on the hood, cuffs, and hem ensures a snug fit and protection from external elements. The ultralight design and stretch fabric make this jacket the ideal choice for those seeking functionality, durability, and comfort in any situation.
