

RAINWEAR

OCEAN rain set

MC4311

MATERIALS

100% polyester/PVC

GRAMMAGE

250 g/m²

FEATURES

Rain suit designed to offer reliable protection in wet environments and adverse weather conditions. It ensures waterproofness, durability, and comfort during work activities. The set consists of a jacket and trousers, both designed to ensure ease of use and protection against wind and rain. The jacket features a front closure with a zipper and buttons, offering a double barrier against water entrance. The internal flap improves protection along the zipper, while the hood with a drawstring allows for precise adjustment to further protect the head and neck. The two waterproof pockets with flaps provide a secure space for storing small items even in the rain. The elasticated windproof cuffs ensure a better fit and prevent the entry of cold air and water. The trousers feature a central button closure and an elasticated waist, designed to offer a comfortable fit adaptable to movement. Buttons on the leg cuffs allow for adjustment of the opening to facilitate donning over work boots. The entire suit is finished with heat-sealed seams, a fundamental element to ensure total waterproofness and prevent leaks.

DETAILS

Jacket:

- Drawstring hood, allows adjustment of head protection based on weather conditions, improving coverage against wind and rain;
- Two waterproof flap pockets, offering a secure and dry space for storing items even in rain or very humid environments;
- Elasticated windproof cuffs, improving insulation and preventing the ingress of cold air or water, thereby increasing thermal comfort.

Trousers:

- Elasticated waist, ensuring a comfortable fit adaptable to movement, enhancing agility during work;
- Buttons at the leg hem, allowing adjustment of the opening to facilitate fitting over safety footwear and improve insulation;

- Heat-sealed seams, ensuring total waterproofing and preventing water infiltration at the garment's most critical points.

QUANTITY PER CARTON

10

CLOSING
