TECHNICAL SHEET

RAINWEAR

OCEAN raincoat

MC4312T0

MATERIALS
100% polyester/PVC

WEIGHT
250 g/m²

FEATURES
A raincoat designed to offer extended and reliable protection during activities in wet environments or under adverse weather conditions. The below-the-knee length ensures greater coverage, effectively protecting the lower body as well. The front closure with buttons and an internal flap provides an extra barrier against wind and water ingress, enhancing insulation. The hood with a drawstring allows precise adjustment of head coverage, easily adapting to the operator's needs. The two waterproof pockets with flaps offer a safe and dry space for storing items during work, while the elasticated windproof cuffs provide a snugger fit, preventing cold air or rain from entering. The heat-sealed seams complete the garment, ensuring complete waterproofness even in high-stress areas.

DETAILS
- Below-the-knee length, offers extended protection, keeping even the upper legs dry during heavy rain;
- Drawstring hood, allows for adjustable head coverage, ensuring personalized protection against rain and wind gusts;
- 2 waterproof pockets with flaps, keep small items dry and secure, even in highly humid conditions;
- Elasticated windproof cuffs, prevent cold air and water from entering, increasing thermal comfort during use;
- Taped seams, ensure total waterproofing in critical areas, preventing any infiltration.

CLOSING
Buttons and inner flap
