

THERMAL VEST

CAPRICORNO bodywarmer

MC4413

MATERIALS

Outer pongee, inner polyester.

GRAMMAGE

240 gr/m², padding 200 gr/m²

FEATURES

Work vest designed to ensure comfort and protection from the cold, while offering great versatility thanks to its reversibility. One side features a high-visibility design, ideal for safe work in environments where it is necessary to be clearly visible; the other side, in professional blue, offers a sober and practical style. The outer fabric is soft and durable, ensuring freedom of movement and a pleasant feeling of comfort. The padding maintains the ideal temperature while keeping the garment breathable. On the blue side, there are chest pockets with reflective bands and zipper closure, as well as two lower pockets for storing tools and objects. Contrast color inserts on the sides and shoulders, both front and back, give a modern and functional look. On the high-visibility side, the vest is equipped with two pockets closed with a flap secured by velcro and a D-ring for quick attachment of accessories. Certified Class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The heat-sealed and segmented reflective bands adapt optimally to body movements, offering greater comfort and freedom of action. More resistant and durable than traditional bands, they are strategically positioned on the chest and shoulders, increasing operator visibility.

DETAILS

On the blue side:

- Zipped chest pockets with reflective strip and two lower pockets, for quick access to small everyday items;
- Contrast color inserts on the sides and shoulder yoke.

On the high-visibility side:

- Two pockets with a Velcro-secured flap closure, for quick access to small everyday items;
- D-ring on the right, for hanging work tools.

CLOSING

Double-slider zip with reflective bands, on the blue side.

REFLEX

Reflective piping on the chest, blue side. Segmented heat-sealed reflective bands, high-visibility side.
