

MULTI-FUNCTIONAL THERMAL GARMENTS

DAYTONA jacket

MC4712

MATERIALS

100% polyester Ripstop 300D PU coated

GRAMMAGE

200 g/m², padding 180 g/m²

FEATURES

This work jacket is designed to offer waterproofing and breathability, while simultaneously ensuring thermal insulation and protection against the effects of environments with temperatures down to -5°C. Thanks to the soft quilted inner lining, the garment provides comfort and warmth, making it ideal for those working outdoors in challenging weather conditions. The ripstop structure is robust and durable, designed for long-lasting wear, reducing the risk of rips and tears, without compromising practicality. The PU coating creates a waterproof barrier. It offers good protection against dirt, oils, and light chemicals, maintaining its properties even after washing and prolonged use. The design includes a retractable hood, which can be folded away when not needed, offering versatility depending on weather conditions. On the chest, the jacket features a right waterproof pocket closed with a high-visibility contrast zipper, equipped with a badge holder loop, perfect for those requiring quick identification at work. On the left side, there is a pocket closed with a flap and Velcro, ideal for securely storing items. Reflective inserts on pocket edges, sleeves, shoulders, and small pockets increase the garment's visibility. All details are designed to ensure functionality and protection, without compromising style and comfort.

DETAILS

- Foldaway hood, deployable as needed to provide protection from weather elements;
- Right chest water-resistant pocket, closed with a high-visibility contrast zipper, with a badge holder loop;
- Left pocket, closed with a flap and Velcro, for quick access to small everyday items.

CLOSING

Zipper covered by a double flap closed by concealed snap fasteners.

REFLEX

Reflective fabric inserts on pocket profiles, sleeves, and shoulders.
