

ACCESSORIES

KGUARD knee pads

MC4913

MATERIALS

100% EVA

FEATURES

Lightweight and durable EVA kneepad, designed to offer protection and comfort during work activities. Made from EVA, a material known for its lightness, flexibility, and shock-absorbing capabilities, it weighs only 31 grams and has a thickness of 14 mm, ensuring excellent protection without compromising freedom of movement. Its compact dimensions make it compatible with most work trousers equipped with kneepad pockets. Ideal for those seeking a practical, durable, and comfortable solution for knee protection in professional environments.
