

SOCKS

Heavy socks

MC492902

MATERIALS

20% wool, 60% acrylic, 18% nylon, 2% elastane.

FEATURES

Winter socks are made with a balanced composition of fibers designed to ensure warmth, comfort, and durability on the coldest days. Wool provides natural thermal insulation and a pleasant soft feel; thanks to the presence of technical fibers, they are lightweight yet robust and durable over time. Elastic, they offer a perfect, non-constricting fit. Thanks to their composition, these socks are ideal for facing winter with maximum comfort, keeping feet warm and dry in every situation. Two-tone style.

CERTIFICATIONS AND STANDARDS

The main external fabric is **OEKO-TEX® Standard 100** certified
