

CHEMICAL PROTECTION

Cft shoe covers (pack 50pcs)

MC5149

MATERIALS

Polypropylene with polyethylene film.

GRAMMAGE

63 g/m²

FEATURES

Disposable boot covers designed to ensure maximum protection and safety in environments with a high risk of chemical and biological contamination. Made from polypropylene laminated with polyethylene film, they offer an effective barrier against liquids, particles, and infectious agents, while maintaining good breathability. Heat-sealed seams ensure a hermetic seal, preventing infiltration at the seams. The design includes fastening ties for a secure closure at the ankle or over the trousers, ensuring stability even during intense movements. Equipped with antistatic properties, they protect against liquid chemicals, small splashes, and infectious agents.

PACK

50 pieces

DETAILS

- Taped seams, protecting the junction points from infiltration;
- Equipped with laces, helping to keep the footwear in position for optimal protection;
- Height 48 cm, extended coverage reaching above the ankle.

AVAILABLE COLOURS

☐ K1 - White

SIZES

☒ In stock
☐ On production
☐ Made to order
☐ Tailor made

FIELDS OF USE

- > Food - cleaning - hospital
- > Chemical-pharmaceutical industry
- > Tertiary - trades

MAINTENANCE

The device is disposable, it does not require maintenance.
