

SERIES CARBOFLAME

CARBOFLAME underpants

MC5620

MATERIALS

Knit: 63% FR Modal, 34% aramid, 2% elastane, 1% conductive fiber.

GRAMMAGE

200 g/m²

FEATURES

Underpants made from an inherently flame-retardant multi-purpose fabric, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection against flames, convective, radiant, and contact heat. Antistatic properties and effectiveness in containing the energy released by an electric arc up to 4 kA complete the safety profile of the underpants. The combination of technical fibers helps perfectly balance protection and comfort, making the garment soft and breathable. The garment's ergonomic cut is designed to follow the body's anatomy, optimizing fit and minimizing compression points or excess fabric. The design promotes localized elasticity in areas subject to greater stress, improving freedom of movement.

MAINTENANCE

Please follow the recommended washing instructions.

QUANTITY PER CARTON

20

CATEGORY

III -> This product is currently planned and produced to comply with Regulation (EU) 2016/425 and subsequent modifications.

DETAILS

- Ergonomic cut, promoting elasticity in strategic points, supporting freedom of movement.
- Red chain stitching in high-stress and high-wear areas, to ensure greater strength and durability.

AVAILABLE COLOURS

● Q4 - Blue

SIZES

	In stock
	On production
	Made to order
	Tailor made

FIELDS OF USE

- > Construction - road works
- > Chemical-pharmaceutical industry
- > Petrochemical industry
- > Logistics
- > Tertiary - trades
