

SERIES CARBOFLAME

LIGHT CARBOFLAME coverall

MC5627

MATERIALS

99% cotton, 1% carbon fiber.

GRAMMAGE

210 g/m²

FEATURES

Coverall made from multi-purpose fabric with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection against flames, convective, and radiant heat. The garment is made with materials that provide antistatic properties. The lightness of the fabric and the high percentage of cotton, combined with technical fibers, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. The 8 pockets make it extremely functional and practical, allowing essential tools and objects to always be within reach during work. Reflective bands sewn on the shoulders, sleeves, and legs increase the operator's visibility, improving safety during work activities. The elasticated cuffs ensure a snug fit at the wrist and prevent the entry of dust, debris, or external agents into the sleeve.

DETAILS

- 2 chest pockets closed by a metal zip, covered by a flap secured with velcro, to ensure quick and convenient access to smaller items;
- Gas detector attachment loop on the right and left;
- Small pocket on left sleeve closed with flap and velcro;
