

SUPERTECH SERIES

SUPERTECH padded jacket

MC5918

MATERIALS

75% cotton, 24% polyester, 1% antistatic fiber. Padding 100% aramid. Lining 50% Lenzing®, 50% aramid.

GRAMMAGE

280 g/m², filling 205 g/m², lining 130 g/m²

FEATURES

Padded work jacket made of multi-purpose fabric with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. The aramid fiber padding makes it suitable even for colder climates. It offers integrated protection against flames, convective, radiant, and contact heat, as well as against small splashes of molten metal. The garment also guarantees protection against limited splashes of liquid chemicals. Antistatic properties and effectiveness in containing the energy released by an electric arc up to 4 kA complete the jacket's safety profile. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The high percentage of cotton, combined with technical fibers, perfectly balances protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. Reflective strips sewn on the shoulders, sleeves, and chest, and reflective inserts applied to the chest improve operator visibility in low-light conditions, increasing safety during work activities. The jacket features two lower pockets with Velcro closure and an internal pocket, making it extremely functional and practical, allowing essential tools and items to always be within reach during work. The elasticated hem ensures an ergonomic fit, contributing to body heat retention, as does the 3 cm elastic closure of the cuffs. The garment is particularly suitable for working in low-temperature environments.

DETAILS

- 2 lower pockets, secured with Velcro, to ensure quick and easy access to smaller items;
- 1 internal pocket, secured with Velcro, ideal for storing valuables;
- 3 cm internal elasticated cuffs, preventing the entry of dust, debris, splashes, or chemical agents into the sleeve and helping to maintain stable body temperature;
- Elasticated hem, allowing maximum freedom of movement without restrictions;
- Double stitching in areas most subject to stress and wear, to ensure greater resistance and durability.

CLOSING

Zip covered by a Velcro-fastened flap.

REFLEX

Double reflective bands sewn on sleeves and chest. Single reflective band sewn on the upper back. Reflective piping on the chest.

IMPORTANT

The jacket is certified in combination with the Supertech padded trousers MC5931.

AVAILABLE COLOURS

 ED - Hi-vis yellow/blue
