

MICROLINES SERIES

MICROLINES bodywarmer

MC6025

MATERIALS

98% PU coated polyester, 2% dissipative fiber, lining 100% FR cotton, padding 100% polyester.

GRAMMAGE

260 g/m², padding 160 g/m², lining 230 g/m²

FEATURES

Work vest made of multi-purpose fabric, with flame-retardant treatment and polyurethane coating, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. Thanks to its waterproof and water vapor resistance properties, it offers extremely effective protection in adverse weather conditions. The garment also provides protection against small flames and limited splashes of liquid chemicals. The vest is made with materials that provide antistatic properties. Certified Class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The polyurethane coating gives the fabric water-repellent properties, making it ideal for use in adverse weather conditions. Reflective bands sewn on the chest and bottom significantly increase the operator's visibility, improving safety during work activities. The cotton lining provides softness to the touch, and the padding makes it ideal even for harsher climates. The 5 pockets, including 2 hand-warmer pockets, ensure practicality and security for storing objects.

DETAILS

- Two lower pockets with handwarmers, closed with flap and velcro, to ensure quick and convenient access to smaller items;
- Internal pocket closed with velcro, to safely store small valuables;
- Lumbar protection, for additional protection;
- Lower vest pockets in contrasting blue color;
- Double stitching in areas most subject to stress and wear, to ensure greater resistance and durability.

CLOSING

Double-slider zipper covered by inner and outer flaps fastened with Velcro.

REFLEX

Double reflective bands around the chest and jacket bottom.

AVAILABLE COLOURS
