TECHNICAL SHEET

MICROLINES SERIES

MICROLINES COMPLEX jacket

MC6030ED

MATERIALS

Double Ripstop FR, PU coated, 98% polyester, 2% antistatic fiber.

WEIGHT

185 g/m², lining 170 g/m²

FEATURES

A work jacket made of multi-purpose fabric with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. Thanks to its waterproof and water vapor resistance properties, it offers extremely effective protection in adverse weather conditions. The garment also provides protection against small flames and limited splashes of liquid chemicals. The jacket is made with materials that provide antistatic properties. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The high-performance technical fabric, made of polyester with a double ripstop structure, ensures high mechanical and tear resistance. The polyurethane coating gives the fabric water-repellent properties, making it ideal for applications in harsh environments. Reflective bands sewn on the shoulders, sleeves, and waist significantly increase operator visibility, improving safety during work activities. The zip-removable hood is designed to offer adjustable thermal insulation according to environmental conditions, while ensuring greater versatility of use and adaptability to different operational contexts. The 4 pockets make it extremely functional and practical, allowing essential tools and items to always be within reach during work. The elasticated cuffs are designed to ensure an ergonomic and snug fit at the wrist, effectively limiting the penetration of liquids, wind, and other extreme weather agents, contributing to the maintenance of the internal microclimate and the user's thermal comfort. The jacket can be used in combination with the Softshell from the same series for increased thermal insulation.

DETAILS

- Detachable hood with zipper, adjustable with drawstring, for modular thermal protection and greater versatility of use;
- Loop for gas detector housing on the right;
- 2 lower pockets closed by flap and velcro, to ensure quick and convenient access to smaller items;
- Vertical pocket closed with zipper;
- Mobile phone chest pocket, with retractable badge holder closed with flap and velcro, to safely store small valuable items;
- Cuffs adjustable with velcro, for an ergonomic closure that contributes to thermal comfort.

CLOSING

Two-way zip covered by a flap secured with Velcro.

REFLEX

Double reflective bands sewn at the waist and sleeves, vertical on the shoulders.

IMPORTANT

The Microlines Complex jacket - MC6030 can be worn in combination with the Microlines Complex - MC6031 softshell to provide enhanced thermal insulation.

AVAILABLE COLOURS

ED - HI-VIS YELLOW/BLUE

HD - HI-VIS ORANGE/BLUE

SIZES
