

MICROLINES SERIES

MICROLINES SPLIT jacket

MC6034

MATERIALS

98% PU coated polyester, 2% dissipative fiber, lining 100% FR cotton, padding 100% polyester.

GRAMMAGE

160 g/m²

FEATURES

Work jacket made from multi-purpose fabric, with flame-retardant treatment and polyurethane coating, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. Thanks to its waterproof and resistance to water vapor properties, it offers extremely effective protection in adverse weather conditions. It also ensures high resistance to heat dispersion, contributing to cold protection down to temperatures of -5°C. The garment also provides protection against limited splashes of liquid chemicals. The jacket is made with materials that provide antistatic properties. The polyurethane coating gives the fabric water-repellent properties, making it ideal for use in adverse weather conditions. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The cotton lining provides softness to the touch, while the padding makes it ideal even for the harshest climates. The detachable quilted interior adds versatility to the garment, allowing it to be used in various ways, depending on the required level of cold protection. Reflective bands sewn on the chest and sleeves significantly increase operator visibility, improving safety during work activities. The foldaway hood is designed for use in adverse environmental conditions, such as rain or wind. When not in use, it can be stored inside the collar, without creating bulk or compromising the operator's freedom of movement. The pockets on the outer jacket, including the 2 waterproof ones, ensure practicality and security for storing items. Also available are 2 hand-warmer pockets, for additional protection against low temperatures. The elasticated cuffs are designed to ensure an ergonomic and snug fit around the wrist, effectively limiting the penetration of liquids, wind, and other extreme weather elements, contributing to the maintenance of the internal microclimate and the user's

thermal comfort.

DETAILS

Outer jacket:

- 2 waterproof lower pockets with flap and velcro closure, to ensure quick and convenient access to smaller items;
- Chest pocket for mobile phone with flap and velcro closure.
- Internal pocket with velcro closure, for securely storing small valuables;
- Elasticated cuffs adjustable with velcro, for an ergonomic closure that contributes to thermal comfort;
- Drawstring waist, allows maximum freedom of movement, without restrictions.
- Foldaway hood with drawstring, usable when needed to provide protection from weather elements;
- Double stitching in areas most subject to stress and wear, to ensure greater resistance and durability.

Quilted interior:

- Detachable via zipper, versatile for differentiated use, depending on the degree of cold protection required;
- Internal pocket on the left with flap and velcro closure and on the right with velcro closure, for securely storing small valuables.

CLOSING

Two-way zip covered by a flap secured with snap buttons.

REFLEX

Double reflective bands on chest, sleeves, and jacket bottom.

AVAILABLE COLOURS

 ED - Hi-vis yellow/blue
