TECHNICAL SHEET

MICROLINES SERIES

MICROLINES jacket

MC6044ED

MATERIALS

98% PU coated polyester, 2% dissipative fiber, lining 100% FR cotton, padding 100% polyester.

WEIGHT

260 g/m², padding 160 g/m², lining 230 g/m²

FEATURES

Work jacket made from multi-purpose fabric, with flame-retardant treatment and polyurethane coating, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. Thanks to its properties of waterproofness and water vapor resistance, it offers extremely effective protection in adverse weather conditions. It also provides high thermal insulation, contributing to cold protection down to temperatures of -5°C. The garment also guarantees protection against limited splashes of liquid chemicals. The jacket is made with materials that provide antistatic properties. The polyurethane coating gives the fabric water-repellent properties, making it ideal for use in adverse weather conditions. Certified Class 3 for high visibility, the garment ensures the highest level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The cotton lining provides softness on contact, and the padding makes it ideal even for the harshest climates. The reflective bands sewn on the chest and sleeves significantly increase the operator's visibility, improving safety during work activities. The stowable hood is designed for use in adverse environmental conditions, such as rain or wind. When not in use, it can be stored inside the collar, without creating bulk or compromising the operator's freedom of movement. The pockets, including 2 waterproof ones, ensure practicality and security for storing items. Handwarmer pockets are also present for additional protection against low temperatures. The elasticated cuffs are designed to ensure an ergonomic and snug fit around the wrist, effectively limiting the penetration of liquids, wind, and other extreme weather elements, contributing to the maintenance of the internal microclimate and the user's thermal comfort.

DETAILS

- Stowaway hood with drawstring, usable as needed to provide protection from the elements;
- 2 water-resistant lower pockets closed with flap and velcro, to ensure quick and convenient access to smaller items;
- 2 hand-warmer pockets closed with flap and velcro, ideal for low temperatures;
- Internal pocket closed with velcro, to safely store small valuables;
- Elasticated cuffs adjustable with velcro, for an ergonomic closure that contributes to thermal comfort;
- Waist drawstring, allows maximum freedom of movement, without restrictions.

CLOSING

Two-way zip covered by a flap secured with snap buttons.

REFLEX

Double reflective bands on sleeves, chest, and jacket bottom.

AVAILABLE COLOURS

- ED - HI-VIS YELLOW/BLUE
- HD - HI-VIS ORANGE/BLUE

SIZES
