

METAL SPLASH SERIES

METAL SPLASH trousers

MC6111

MATERIALS

54% LENZING™ FR, 20% wool, 20% polyamide, 5% aramid, 1% dissipative fiber.

GRAMMAGE

330 g/m²

FEATURES

Work trousers made from inherently flame-retardant fabric, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. They offer integrated protection from flames, convective, radiant, and contact heat, as well as from molten metal splashes. The antistatic properties of the fabric complete the garment's safety profile. The fabric structure ensures permanent flame resistance, without loss of effectiveness over time or with washing. The 3 pockets make them functional and practical, allowing essential tools and items to always be at hand during work.

FIELDS OF USE

- > Heavy industry
- > Petrochemical industry

MAINTENANCE

Please follow the recommended washing instructions.

QUANTITY PER CARTON

20

CATEGORY

III -> This product is currently planned and produced to comply with Regulation (EU) 2016/425 and subsequent modifications.
