

MULTI-PROTECTION KNITWEAR

SULTAN polo shirt

MC6219

MATERIALS

60% modacrylic, 38% cotton, and 2% conductive fibers.

GRAMMAGE

210 g/m²

FEATURES

Work polo shirt made of versatile fabric, with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments, where exposure to multiple hazards is constant. It offers integrated protection from flames, convective, radiant, and contact heat, as well as from small splashes of molten metal. Antistatic properties and effectiveness in containing the energy released by an electric arc up to 4 kA complete the safety profile of the polo shirt. The percentage of cotton present, combined with technical fibers, contributes to perfectly balancing protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. Certified in class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The closed collar with three covered buttons offers increased operational safety and a clean finish. The reflective bands sewn on the sleeves and chest and the reflective inserts positioned on the front shoulder increase the operator's visibility, improving safety during work activities. The side slits offer greater freedom of movement and ergonomic fit. The elasticated cuffs ensure a snug fit at the wrist, preventing the entry of dust, debris, splashes, and chemical agents into the sleeve.

DETAILS

- Collar fastened with buttons covered by flap, easy to open and close, robust, and durable;
- Elasticated knit cuffs, preventing the entrance of external elements into the sleeve;
- Side vents, for an improved fit around the hip area;

REFLEX

Double reflective strips sewn on sleeves and chest. Piping on the chest.

AVAILABLE COLOURS
