

MULTI-PROTECTION KNITWEAR

PIREX sweatshirt

MC6220

MATERIALS

50% cotton, 39% acrylic, 10% viscose, 1% antistatic.

GRAMMAGE

380 g/m²

FEATURES

Work sweatshirt made from versatile fabric, with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection from flames, convective, radiant, and contact heat, as well as from small splashes of molten metal. Antistatic properties and effectiveness in containing the energy released by an electric arc up to 4 kA complete the sweatshirt's safety profile. The high percentage of cotton, combined with technical fibers, perfectly balances protection and comfort, making the garment soft and breathable without compromising robustness and mechanical resistance. Certified Class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The collar, closed by a metal zip covered by a flap and velcro, offers enhanced operational safety and a clean finish. The reflective bands sewn on the sleeves and chest increase the operator's visibility, improving safety during work activities. The elasticated cuffs ensure a snug fit at the wrist, preventing the entry of dust, debris, splashes, and chemical agents into the sleeve. The elasticated waist, adapting to the body, reduces the risk of getting caught in machinery or tools and improves ease of movement, especially in manual or technical work.

DETAILS

- Collar closed with a metal zip, covered by a flap fastened with velcro, practical and robust, resistant to wear.
- Elasticated knit cuffs and waistband prevent external agents from entering the sleeve and keep the sweatshirt in place at the waist.

REFLEX

Double reflective strips sewn on sleeves and chest.
