

MULTI-PROTECTION KNITWEAR

GOMEZ polo shirt

MC6223

MATERIALS

99% polyester, 1% antistatic fiber.

GRAMMAGE

180 g/m²

FEATURES

Work polo shirt made from multi-purpose fabric, with flame-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. The garment is made with materials that provide antistatic properties. Certified to Class 2 for high visibility, the garment ensures a medium-high level of visibility in daylight and nighttime conditions, even in the presence of artificial lighting such as vehicle headlights. The dark color on the lower section helps to conceal stains and signs of wear, which easily accumulate on the lower part of the garment during work activities. The reflective bands sewn on the shoulders, sleeves, and chest increase the operator's visibility, improving safety during work activities. The elasticated cuffs ensure a snug fit at the wrist, preventing the entry of dust, debris, and external agents into the sleeve.

DETAILS

- Stretch knit collar and cuffs for an ergonomic and comfortable fit, the cuffs prevent the entrance of external agents into the sleeve.

REFLEX

Reflective bands on the shoulders. Double reflective band on sleeves and chest.
