

ALUMINIZED GARMENTS

Proximity coverall

MC6411

MATERIALS

Aluminized para-aramid fiber

GRAMMAGE

460 g/m²

FEATURES

Proximity coverall, made from aluminized, inherently flame-retardant para-aramid fiber, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection from flames, convective, radiant, and contact heat, as well as from small molten metal splashes. The garment is designed to ensure protection and practicality in specialized operations. The design features a stand-up collar, free of points or protruding flaps, which effectively protects the cervical area from heat, splashes, and external agents, while simultaneously reducing the risk of entanglement in machinery or equipment. An integrated cylinder pouch is located on the back, designed to allow for the safe and functional transport of necessary equipment. Made with durable materials and high-quality finishes, this suit is designed to offer freedom of movement and reliability in the most demanding operational conditions.

DETAILS

- Mandarin collar, effectively protects the cervical area from potentially harmful external agents;
- Rear cylinder carrier bag, for the safe and functional transport of necessary equipment;
- Double stitching in high-stress areas, for increased strength and durability.

CLOSING

Front closure with metal snap buttons covered by a flap and velcro.
