

ALUMINIZED GARMENTS

Proximity apron

MC6419

MATERIALS

Aluminized para-aramid fiber

GRAMMAGE

460 g/m²

FEATURES

Proximity apron, made of aluminized para-aramid fiber, inherently flame-retardant, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection from flames, convective, radiant, and contact heat, as well as from small splashes of molten metal. The garment is designed to ensure protection and practicality in specialized operations. The fastenings with straps made of aluminized aramid fabric ensure durability and security, keeping the apron stable during use. With dimensions of 70 x 100 cm, it offers broad and functional coverage, ideal for protecting the body during operations in extreme environments. Every detail is designed to combine robustness, practicality, and comfort.

MAINTENANCE

Please follow the recommended washing instructions.

QUANTITY PER CARTON
